DETAILED ACTION

Applicant's Amendment filed on 6-14-04 has been received and entered in the case. All previous claims were canceled and replaced by new claims 21-40.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 21-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 6,614,289 (hereinafter "289"). Although the conflicting claims are not identical, they are not patentably distinct from each other because they all call for the same inventive device. For instance, a first means for normally not conducting (claim 21); a switching device normally in an off state (claim 25) and a normally off active device (claim 31) are essentially referred to a normally off transistor as recited in claim 1 of "289". Similar, a second means for starting conduction (claim 1) and a starter device (claims 25 and 31) are essentially referred to a first starter of claim 1 of "289". As to 0.4volts limitation of claims 26, 35, 38 and 40 to switch a transistor, it is seen as inherent operational characteristics of a transistor.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 21-40 are rejected under 35 U.S.C. 102(b) as being anticipated by the Majumdar et al. reference (U. S. Patent 4,672,245).

Majumdar discloses in figure 1 an apparatus comprising a normally off FET (2), (FET is a generic device representing both JFET and MOSFET), and a starter (BJT 3) coupled to the FET as required by claims 21-24.

The scopes of claims 25, 28-29, 31, 33-34, 36-37 and 39 are similar to those of claims 21-24 as noted above. Thus, they are rejected for the same reason set forth above.

As to claims 26, 27, 35, 38 and 40, they are rejected since 0.4 volts for switching a transistor is seen as an inherent operational characteristics of a transistor.

As to claims 30 and 32, figure 1 of Majumdar labels his circuit semiconductor device and explicitly shows his circuit arrangement being on the same substrate.

Response to Arguments

Applicant has canceled all previously rejected claims and added new claims. Applicant offers no argument with respect to the rejected claims presented in previous Office Action.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
